01.calculators_HTTP Request

Objective: To evaluate the performance and accessibility of the Calculators module using Apache JMeter. This test validates HTTP request execution, response code verification, response time measurement, and application stability. The module was executed successfully and returned a valid HTTP 200 OK response, indicating reliable server communication and successful page loading.

The screenshot shows the JMeter View Results Table. The left sidebar displays the test plan structure: 'Test Plan' -> 'easycalculation' -> 'Calculators_HTTP Request' -> 'View Results Table'. The main panel shows a table of test results with columns: Sample #, Start Time, Thread Name, Label, Sample Time, Status, Bytes, Sent Bytes, Latency, and Connect Time. The table contains 20 rows of data, all with a green status icon. The right sidebar shows the 'Table' tab with a 'Table result' section.
